Services

- Systems and Network Integration
- Modernized Surveillance System.
- Bio-Metric/ Face Recognition Attendance System.
- Access Control RFID/HID Solutions.
- PBX/IP-PBX System.
- Data Center Designing and Management.
- Web Development/Designing
- Search Engine Optimization.
- Android Development.
- IOS development.
- Software Development.
- Project Management
- Training

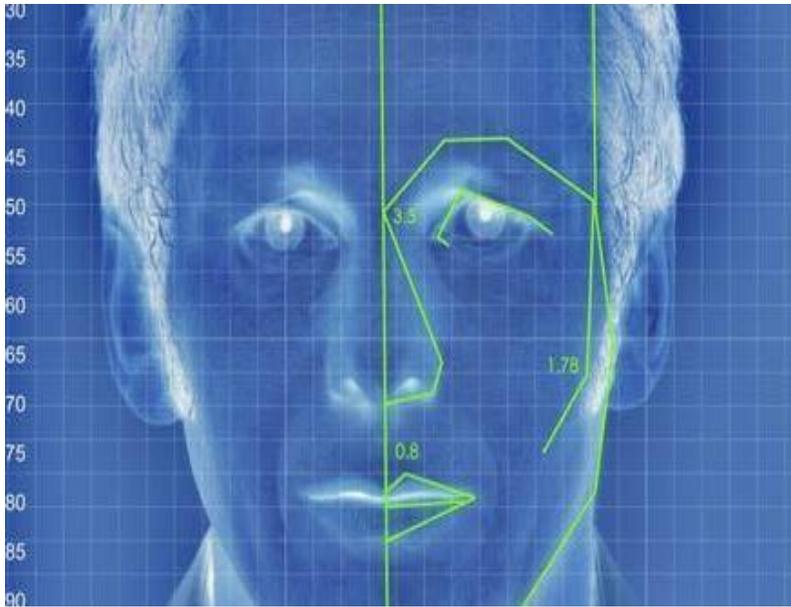

System and Network Integration:

We specialize in system and network integration, we have equipped network technicians for deployment and layout of network infrastructure and system integration. Our design engineers ensure data center availability by implementing a fully redundant, fault-tolerant, and concurrently maintainable IT and support infrastructure architecture.

Modernized Surveillance System:

Surveillance System has become an important need to ensure security and theft protection in new era, we have team to meet your needs by deployment of modernized surveillance system with latest security features. Implementation and ensuring the security you need is our responsibility.

Bio-Metric and Face Recognition Attendance System:

Bio-Metric Attendance has successfully replaced the manual attendance systems. We are specialized in full filling your needs for Bio-Metric and facial Attendance System

Access Control RFID/ HID Solutions:

In the fields of physical security and information security, access control is the selective restriction of access to a place or other resource. We have modern Solutions for Access Control System for information security. Designed to work together seamlessly, we provide you with the technology you need to deliver sophisticated security solutions—from the simplest to the most challenging.

PBX/IP-PBX System:

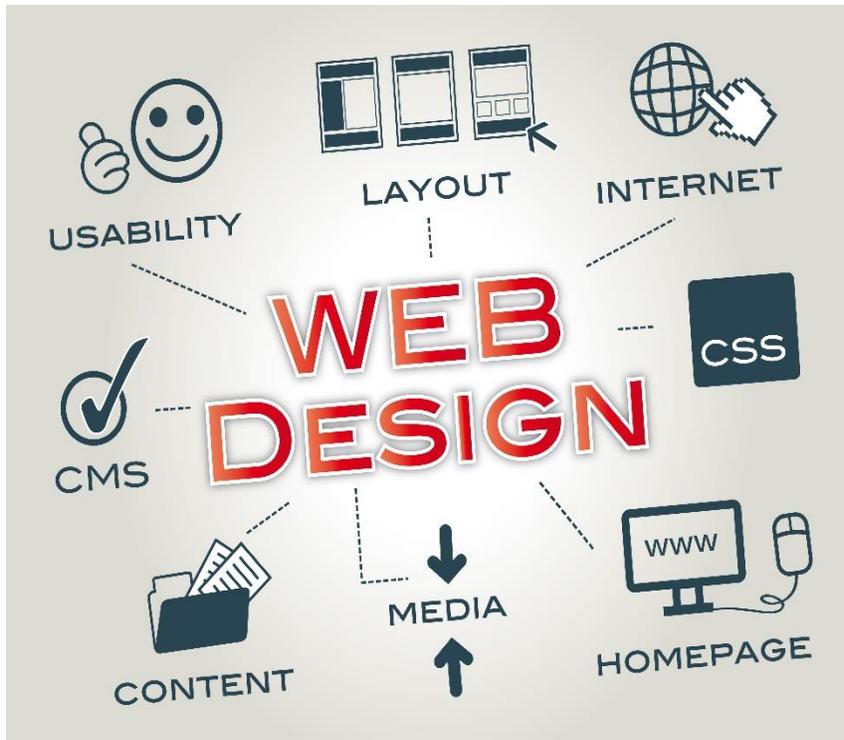

A private automatic branch exchange (PABX) is an automatic telephone switching system within a private enterprise.

Techvariance provides a reliable solution that enables 24*7 connectivity of the organization for all its communication needs. We Provide PABX features catering to needs of small to large organizations.

Data Center Designing and Management:

Today's data centers are no longer just an enabler to the business; they can often provide corporations with competitive advantages and are the underpinnings to corporate success. Effective data center infrastructure management strategies can propel the efficiency, utilization, and availability of data center assets and services.

Web Development/ Designing:

We have best team to design the website for your need. Our Web development/ Designing team can design website of any template that you want in limited time frame. Therefore designing a website of your need is not a big deal for us just order your requirement and your website is ready with responsive and SEO customized design.

Search Engine Optimization:

SEO is a whole process of making you visible at highest ranks on important search engines, and it is all done through “Natural” or “Organic” way. We Provide your Solutions for SEO, PPC, SMM, SMO, LBL and Content Writing Services.

Android Application Development:

Android application development in Pakistan takes advantage of the much talked about Google Android OS platform highly popular for its intuitive design, compatibility with multiple networks and capacity for game-changing applications. With our expert teams of productive Android app developers and programmers, Techvariance offers a whole lot of Android apps development solutions to its global clients which cover almost all the segments of Android development based upon their requirements. Our work is not only delivering just a solution, but to develop Android app right from the scratch.

IOS Development:

Techvariance is experienced iPhone Development Company. With our technical expertise, refined methodology and unique development process, our iPhone app developer can design and develop creative and innovative iPhone applications built for our customers are chartbusters in App Store and helped us to stand out from the crowd and beat competition.

DEVELOPMENT**

Software Development

Customized Software Development:

When it comes to developing an Application, many developers aim to create a software with a universal scope for a particular field without considering the special requirements of a customer. But at Techvariance we do not aim at selling a software with a universal scope, as it has got many features which may not be needed by a client, Instead we believe in customizing our Applications so that a customer get exactly what he wants.

Project Management:

Successful implementation of our projects requires strong management capabilities and communications protocols that have been setup from the beginning. Most importantly, Techvariance provides guidance for technological modification (and corresponding changes) to achieve a complete and balanced solution. It uses a deliverables-driven approach that incorporates elements of a risk assessment focused philosophy.

ICT Training:

Techvariance is the leading provider of customized technical education to both the conventional and corporate markets. At Techvariance, we offer a wide variety of customized and standard trainings, covering most of the modern day technologies from vendors like Cisco, Juniper, Microsoft, Red Hat, etc.
